DID YOU KNOW?

The state of Maine has a law 24-A 2164-C Free Competition that allows the consumer to choose the repair shop of their choice and the insurer has to pay for all the repairs from the accident to be completed properly and completely. They can't tell you where you have to go for your "estimate" or the "repairs".

Cobb's Collision Center provides accurate and complete collision repairs services for a fair and reasonable price?

If you have a claim with your insurer and you don't agree that they are paying the claim fairly you can hire us as your appraiser and we will help you administer your "appraisal clause" in your insurance policy to get you paid correctly and fairly for your claim.

If you were hit by another party and they were at fault for the damages to your vehicle we can assist you in recovering the value your vehicle has lost because someone else damaged it. This is also known as "diminished value".

Accident Inspection Services a service of Cobb's Collision has re-inspected hundreds of repairs and 9 out of 10 have shown either fraud, poor quality, incomplete or unsafe repairs. In fact a number of times after the repairs were completed by these "Network or Insurer preferred shops" the vehicles were totaled by the same insurer that paid to repair them because of what we uncovered in the inspection. These are the same vehicles that you drive your kids to school and the sports fields in....

If you want honest and dependable service and your car has been involved in an accident, give us a call. We won't sacrifice your family's safety in order to cut a deal with the insurer. We will work for YOU, the car owner.

"Professionalism and Integrity one customer at a time"

If high gas and oil prices weren't enough, now your car has been wrecked and the insurer wants you to take your car to "their" repair shop, you know the shop they prefer that cuts corners and gives the insurer discounts.

Wait? What? Gives the insurer a discount? It's your car why is the insurer getting a discount? Oh yeah see the repair shop has to put on cheap imitation parts and junk salvage parts to make sure the insurer keeps referring them work. How else can they make up for the loss in profits? Have you seen the poor quality that comes from all of these shops?
